

Amateur Radio Society

A new secretary and treasurer were appointed at the end of last term when Mike Arnold left school. They are Kalveks R. J. as treasurer and Vickers K. A. as secretary.

This term we have arranged a regular contact with Steve Flather and Dave Pickles, two old boys of the school who are now at University. Other interesting contacts include one of the few stations on the island of Malta.

Also we were lucky enough to be in possession of a television set during the Apollo 14 moon mission and this was much appreciated by some of the prefects, monitors and Upper Sixth Science. K.A.V.

Amateur Radio Society

This term we have been given a large amount of equipment and components by an ex-member of the club. This included a tape-recorder which required attention but which has now been repaired. We have also repaired radios and other items brought in by members of the School.

Next term we hope to arrange for beginners to construct small electronic gadgets which will be simple and cheap to build but will be interesting and instructive for them. K.A.V.
